ABHISEK KUMAR

SOFTWARE ENGINEER

github.com/abhiseksinha23
linkedin.com/in/abhisek-kumar-38148b18a/

EDUCATION

B.Tech (Hons) in Computer Science and Engineering, *National Institute of Technology, Jamshedpur*
CGPA 8.31

2017 - 2021

SKILLS

Languages / Frameworks	C++, Python, Java, Golang, JavaScript, NodeJs, ExpressJs, React, SpringBoot, Django
CS Fundamentals	Data Structures, Algorithms, System Design, OOPS, DBMS, OS, GIT, Networking
Web Tech/ DB	HTML, CSS, RESTful, MongoDB, MySQL, PostgreSQL
Systems/ Infrastructure	Distributed Systems, Microservice architecture, Cloud infrastructure, Linux Systems, Virtualization, RPC, REST, Storage Systems, Backup and Recovery Systems

WORK EXPERIENCE

Member of Technical Staff 3

03/2022 — Present

Nutanix, INC

Bangalore, India

- Designed and scaled **cluster-level disaster recovery workflows** for distributed environments, increasing supported capacity from **200 → 10,000 VMs/Volume Groups** per cluster (**50x scale**).
- Built and maintained recovery orchestration systems responsible for consistent failover & rollback across large-scale VM clusters.
- Implemented stateful **“Revert”** functionality for VMs and Volume Groups, enabling reliable rollback to previous recovery points across distributed storage systems.
- Optimized network performance in virtualized environments using SR-IOV, improving packet throughput by **70%** and reducing latency in recovery workflows.
- Contributed to system-level performance optimization by replacing Python-based JWT validation with a high-performance C++ implementation, reducing VM crash rates from **30% to <1%**.
- Improved infrastructure test frameworks and execution pipelines, reducing runtime from **6+ hours to <30 minutes** and lowering **infra cost by 95%**.
- Designed and implemented secure authorization workflows for **Change Block Tracking (CBT)** used by backup vendors (**patented**), ensuring data integrity and secure access in distributed backup systems.
- Acted as SME for recovery workflows, debugging cluster-level failures, identifying bottlenecks, and improving system reliability.**
- Collaborated with cross-functional teams to improve observability via logs and debugging workflows, enabling faster issue resolution in distributed environments.
- Worked closely with **clustered virtualization environments and storage systems**, gaining hands-on experience with **distributed infrastructure and failure handling**

Associate Software Developer

06/2021 - 03/2022

Lowe's India

Bangalore, India

- Developed both UI and backend features for the post-checkout page.
- Received SPOT award for the work.

PERSONAL PROJECTS

SMARTKART - A conversational E-commerce site

- E-commerce website in which each user gets a personal assistance(Eve), which help the user to take the user to the desired products with having conversation with the user and helps the user in shopping.
- Tech Used - ReactJs, NodeJs, MongoDB, Javascript

Camping-Grounds

- Platform to share camping experience, image of the camping site ,description, including cost of the tour(price per night). It provides feature to create new campgrounds and to add comments/reviews on the exciting campgrounds.Users are provided separate profile pages which can also be seen by other users as well through the link of the author of the campground.
- Tech Used - NodeJs, ExpressJs, MongoDB

CODING HANDLES

HACKEREARTH HACKERRANK LEETCODE CODECHEF CODING NINJAS GEEKSFORGEES CODEFORCES

ACHIEVEMENTS

- * Won the American Express Codestreet 2020 coding challenge.
- * Finalist at Airbus Airothon 3.0 2021 (TOP 10)
- * Ranked within Top 30 teams out of 1K teams in Lowe's Hackathon
